Grades 5 – 8
Forestview Middle School

Grades 9 – 12
Brainerd High School

Alternative and Early Education
Brainerd Learning Center
Lincoln Education Center
Warrior Early Learning Center
Washington Educational Services Building

Introduction

Brainerd Public Schools is located in central Minnesota in Crow Wing County and covers approximately 517 square miles. It serves approximately 5,900 early childhood through 12th grade students on a student resident base of approximately 6,500 in the communities of Brainerd, Baxter, East Gull Lake, Fort Ripley, Garrison, Lake Shore, Merrifield, and Nisswa.

Of the 327 school districts in the state of Minnesota, Brainerd Public Schools is the 34th largest school district in the state and is the sixth largest school district outside of the seven-county Twin Cities metro area based on 2023-24 student enrollment.

The school district's 2024-25 student population composition reflects a lower level of overall diversity versus the state average with the exception of American Indian. However, the school district serves a higher concentration of students requiring special education services.

Ethnicity	Brainerd	State
American Indian	3.80%	3.55%
Asian	0.58%	7.11%
Black or African American	1.17%	12.13%
Hispanic or Latino	2.58%	11.57%
Native Hawaiian or Pacific Islander	0.05%	0.12%
Other Indigenous Peoples	0.03%	0.07%
White	87.88%	60.22%
Two or More Races	3.92%	5.22%

Special Population	Brainerd	State
Free or Reduced	40.19%	40.31%
Special Education	24.02%	19.05%
English Learner	0.56%	10.4%
Experiencing Homelessness	0.41%	1.22%

Source: MDE

The most significant fund for the operation of the school district is the General Fund (Fund 01). The school district uses the General Fund to cover the daily costs of educating students across its twelve schools.

Budget Fundamentals

Brainerd Public Schools operates a fiscal year from July 1-June 30. The preliminary budget is presented for approval to the school board each June.

Minnesota school districts, charter schools, cooperative districts, area learning centers, private alternative schools, and non-public schools are required by law to submit financial reports and annual budgets. These financial reports include the detailed tracking of revenues and expenditures within Uniform Financial Accounting and Reporting Standards (UFARS) fund classifications to meet legislative requirements for school districts and provide financial accountability for public fund allocations.

The preliminary budget authorizes the school district to begin fiscal operations for the year. The mechanics of the budgets being presented for each of the funds is the same. The total revenue and expenditure numbers from each fund's recent fiscal year 2025 budget revision completed in March 2025 is adjusted for items in which are known or expected to change for fiscal year 2026.

There are many tools available to complete as accurate of projections as possible. These tools include Minnesota Department of Education (MDE) supported revenue forecast models and independent and locally designed and supported forecast models.

Brainerd School District's Financial Year

June	The preliminary budget is presented for approval to the school board.
July	The school board reviews and approves long-term facilities maintenance plan and fees for the current school year.
September	The school board reviews and approves preliminary property tax levy for the next calendar year, which is the following school year.
December	The school board holds a truth-in-taxation hearing for the approval and certification of the final property tax levy for the next calendar year, which is the following school year.
	The school district's prior year audit is presented for approval to the school board if complete.
January	The resolution for school district administration to analyze the financial condition of the school district.
	The school board approves the first budget revision for the current school year if complete.
April	If needed, the school board approves the second budget revision for the current school year.

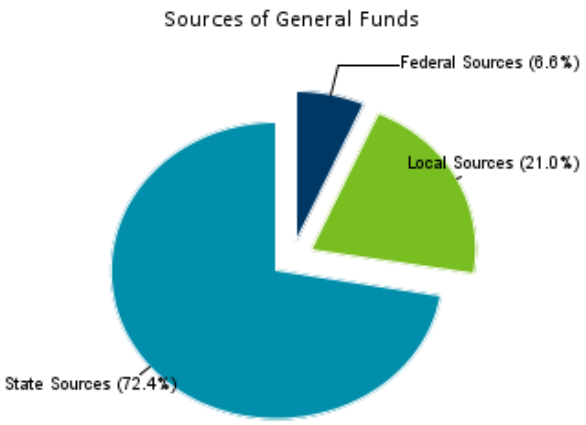

A school district's budget is comprised of categories called "funds". Each fund maintains its own separate revenues, expenditures and fund balances.

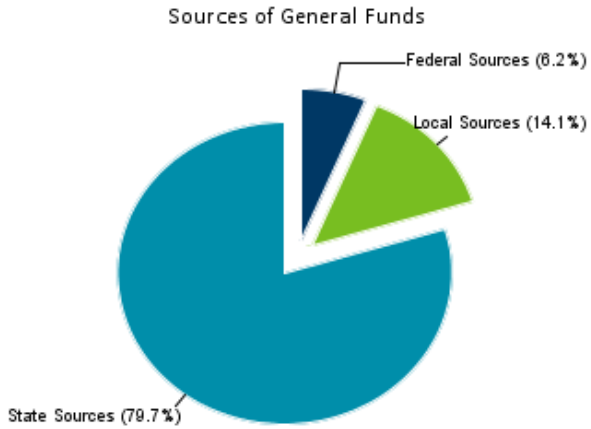

Fund Number	Fund Title	Common Purpose
01	General	To account for all revenues and expenditures of the school district not accounted for elsewhere, i.e. educational activities, school district instructional and student support programs, expenditures for the superintendent, district administration, normal operations and maintenance, pupil transportation and capital expenditures.
02	Food Service	To record financial activities of a school district's food service program.
04	Community Service	To record all financial activities of the community service program.
X6	Building Construction	To record all operations of a school district's building construction program that are funded by the sale of bonds, capital loans or major capital projects costing $2,000,000 or more.
07	Debt Service	To record revenues and expenditures for a school district's outstanding bonded indebtedness, whether for building construction or operating capital and whether for initial or refunding bonds.
45	Post-Employment Benefits Irrevocable Trust	To report resources set aside and held in an irrevocable trust arrangement for post-employment benefits.
47	Post-Employment Benefits Debt Service	To record levy proceeds and the repayment of the other post-employment benefits (OPEB) bonds.

Revenues for the budget are presented by source, which provides for a separation of revenues by source of funding. This identifies revenues of a general nature (such as property tax levies or general education aid) or for specific categorical programs. It best serves as a means of summarizing by major revenue classifications (e.g., local, state, or federal). Revenues by source are subdivided into the seven categories in the table below.

REVENUE CATEGORY	SOURCE CODES
Local Revenues	001-099
State Revenues	200-399
Federal Revenues (received through state agencies)	400-499
Federal Revenues (received directly)	500-599
Other Local Revenue	601-629
Sale of Bonds and Loans	631-640
Incoming Transfers from Other Funds	649-699

The graphs below show a comparison of revenue sources for the fiscal year 2024 compared to the average of school districts across the state.

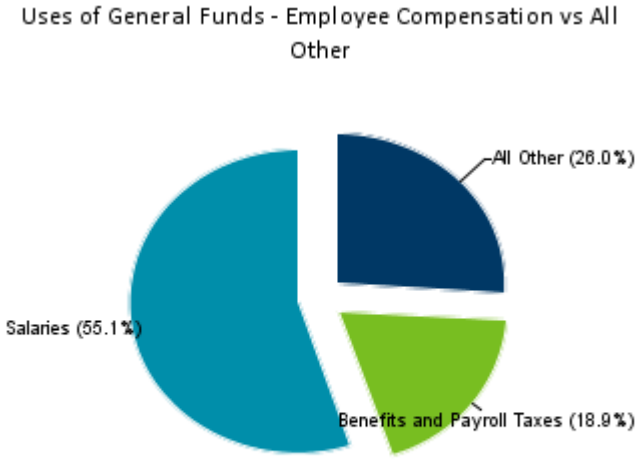

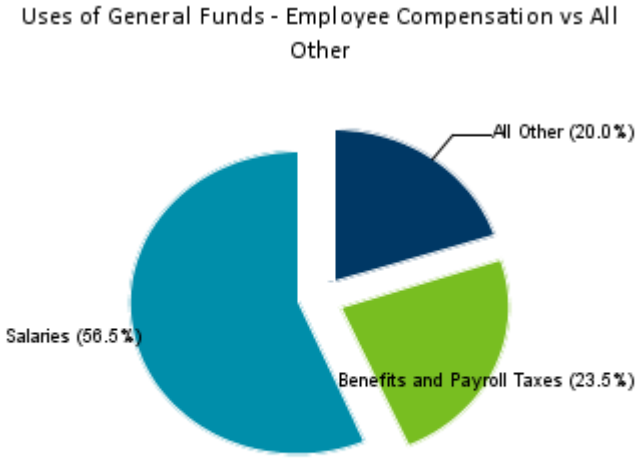

Source: MDE – left graph is statewide, right graph is Brainerd Public Schools.

Expenditures for the budget are presented by object, which provides expenditure detail as to the service or commodity purchased (i.e., salaries, bond interest or technology equipment.) Expenditures by object have eight major categories, which are listed in the table below.

EXPENDITURE CATEGORY	OBJECT CODES
Salaries and Wages	110-199
Employee Benefits	210-299
Purchased Service	301-399
Supplies and Materials	401-499
Capital Expenditures	510-590
Debt Service	710-790
Other Expenditures	810-899
Other Financing Uses	910-920

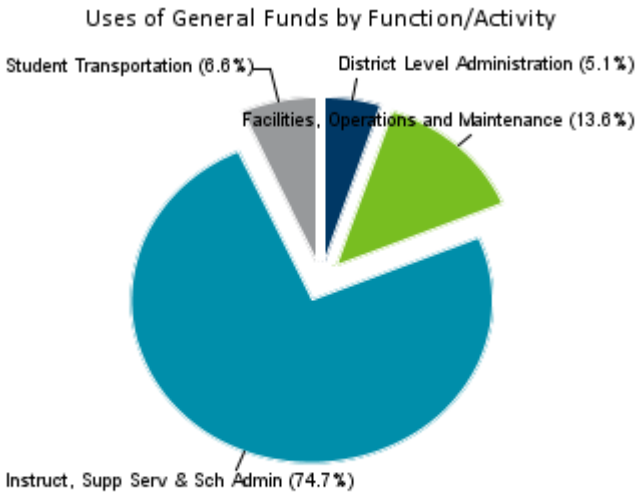

The graphs below show a comparison of the composition of expenditure by object categories for the fiscal year 2024 against the average of school districts across the state.

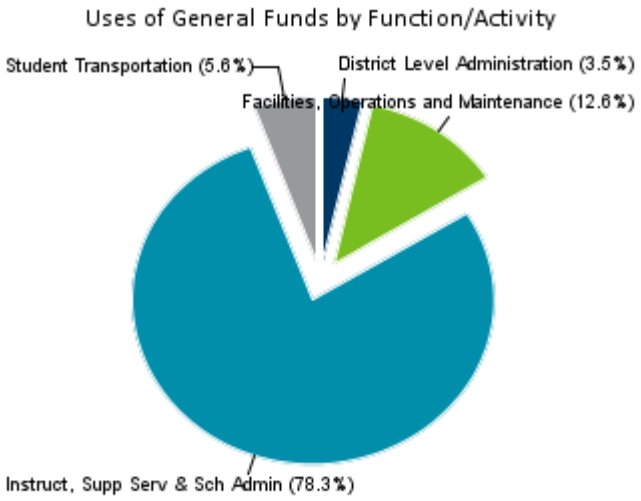

Source: MDE – left graph is statewide, right graph is Brainerd Public Schools.

The graphs below show a comparison of district administration, operations and maintenance, instructional, support services and school administration and transportation uses versus the state average for fiscal year 2024.

Highlights for fiscal year 2026 General Fund budget include:

- Increase in general education formula aid due to inflationary factor of 2.74 percent
- Decrease in enrollment from 2024-25 of approximately 121 adjusted pupil units
- 13.6 percent decrease in poverty-based state funding (Basic Skills Revenue)
- Increase in the levy
- Increase in salary of negotiated labor agreements and related benefits (including new paid and family medical leave)
- Increase in contracted transportation and OPEB implicit subsidy draw
- Adding back partial Coronavirus Aid, Relief and Economic Security (CARES) funded positions
- A planned net decrease in staffing of approximately 15.4 full-time equivalents (FTE)
- Known replacement savings
- Moving technology staff to operating capital for one year to spend down fund balance
- Moving instructional staff to basic skills and learning and development for one year to spend down fund balance
- A decrease of the unassigned fund balance to a level equal to 9.9 percent of General Fund expenditures

General Fund revenue and expenditures are separated into restricted and unassigned fund balances. The budget tables show the detailed separation of the General Fund budget into the various unassigned and restricted accounts.

A portion – approximately 81.5 percent – of the school district budget is without formal restrictions in how the funding is spent. These "unassigned" funds are what the school district has the most local flexibility to spend on achieving the student-centered priorities. Thus, much of the local management of the budget becomes reliant on the more flexible "unassigned" area.

The unassigned segment of the budget has expenditures exceeding revenues by $2,240,084, decreasing the unassigned fund balance to approximately $9.9 million.

MDE calculates fund balance for the purposes of tracking school districts' financial solvency; however, measurement of the fund balance for purposes of the school board fund balance policy, slightly differs in how the fund balance percentage is calculated by MDE.

For purposes of a measurement for monitoring the fund balance in terms of the school board fund balance policy, the unassigned fund balance is calculated as a percent of total annual General Fund expenditures.

School districts and charters schools are required to comply with Minnesota Statutes, section 123B.83 – Expenditure Limitations, which requires that a school district must limit its expenditures so that the calculated net unreserved General Fund balance as of June 30 does not constitute statutory operating debt (SOD).

According to Minnesota Statutes, section 123B.81, subdivision 2, SOD exists if the school district's operating debt is more than 2.5 percent of the most recent fiscal year's expenditure amount.

If a school district reaches SOD as of June 30, by January 31 of the following year of SOD, the school district is required to submit a special operating plan the commissioner for approval. A school district cannot freely operate with a negative unassigned fund balance in excess of 2.5 percent of its annual expenditures.

MDE's SOD calculation factors the unassigned fund balance as a percent of only the unassigned expenditures. Since the expenditures that are funded with unassigned revenue are lower than the overall expenditures for the school district, this fund balance percentage is slightly higher than the percentage used for purposes of measurement against the school board fund balance policy.

MDE Calculation

Revised Budget Fiscal Year 2025	
Unassigned Fund Balance	$12,161,333
+ Assigned Fund Balance	$412,177
+ Non-Spendable Fund Balance	$434,747
+ Restricted Fund Balance	$141,832
= Unreserved Fund Balance	$13,150,089
Unreserved Fund Expenditures	$82,486,996
Fund Balance Percent per MDE Calculation	15.9%

MDE Calculation

Preliminary Budget Fiscal Year 2026	
Unassigned Fund Balance	$9,921,249
+ Assigned Fund Balance	$519,587
+ Non-Spendable Fund Balance	$434,747
+ Restricted Fund Balance	$141,832
= Unreserved Fund Balance	$11,017,415
Unreserved Fund Expenditures	$82,095,557
Fund Balance Percent per MDE Calculation	13.4%

Fund Balance Policy Calculation

Revised Budget Fiscal Year 2025	
Unassigned Fund Balance	$12,161,333
Total General Fund Expenditures	$98,266,433
Fund Balance Percent per Policy	12.4%

Fund Balance Policy Calculation

Preliminary Budget Fiscal Year 2026	
Unassigned Fund Balance	$9,921,249
Total General Fund Expenditures	$100,469,463
Fund Balance Percent per Policy	9.9%

The table above is a comparison of how the fund balance percentage is calculated for each purpose as described above for the revised budget for FY25 and preliminary FY26 budget.

As mentioned, the largest difference in the two calculations is that the fund balance is compared to only the expenditures that are contained within the unreserved budget rather than the entire expenditures of the General Fund budget.

While most school districts across the state measure the level of fund balance and establish board policy to guide overall management of the budget with the connectivity to the fund balance using the simpler calculation, all school districts are consistent in how the data is organized for the MDE calculation. Because of this, any school district in the state can compare to any other school district.

In the early 2000's, the school district began a pattern of deficit spending, using its fund balance as a means to fill the gap between recurring revenues and expenditures.

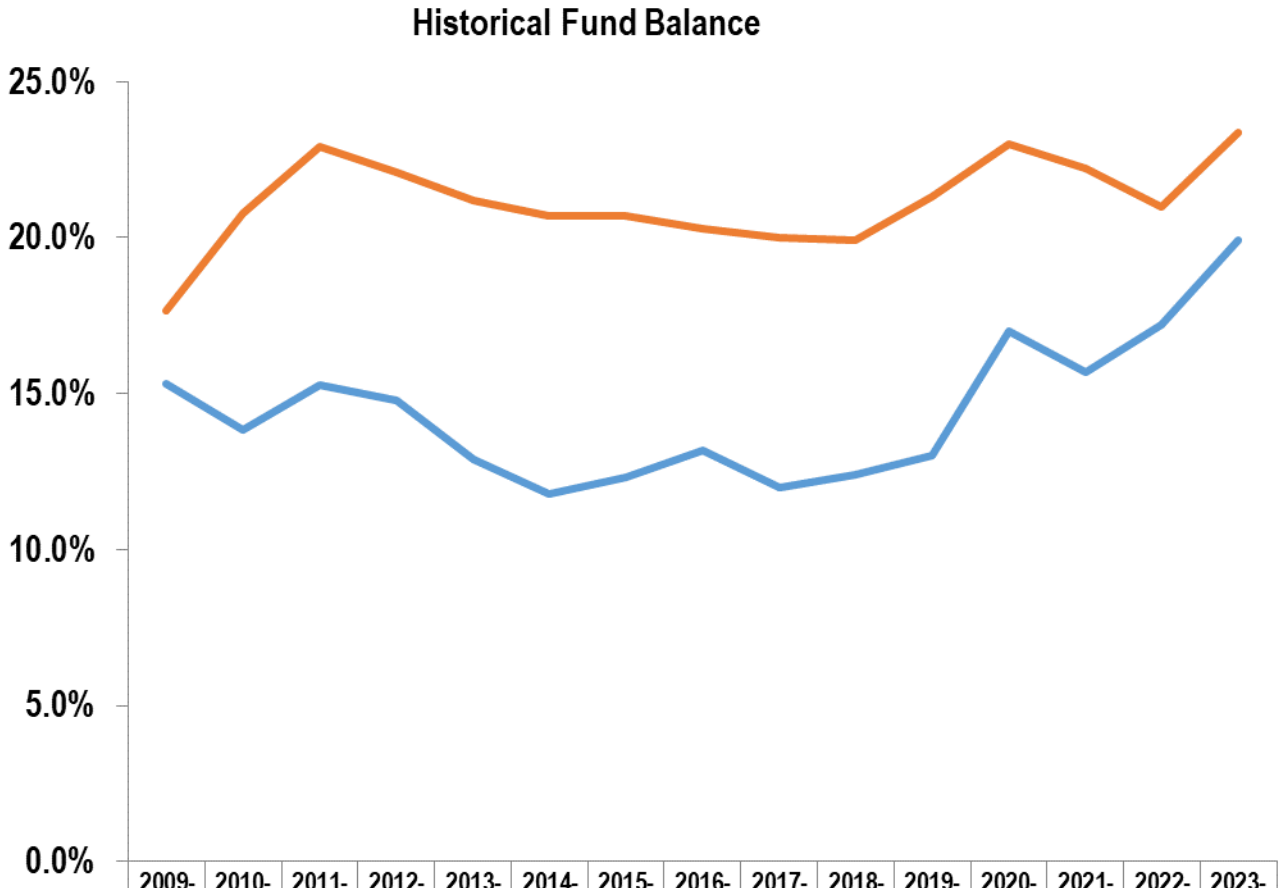

The school district sought voter approval of an additional funding through a local operating levy, which failed in November of 2007, resulting in nearly $6 million of budget reductions and recovering the fund balance near a level similar to the state average. Since then, the school district stabilized its expenditures and operating budget resulting in a stable level of fund balance.

For 2024-25 and 2025-26 the school district has a projected deficit and will be using fund balance as a means to fill the gap between revenues and expenditures.

The school district would need to grow its fund balance by nearly $6 million in order to reach a level comparable to the state average of 23 percent of annual expenditures.

Based on the fiscal year 2024 fund balances for all school districts in the state Brainerd Public Schools is currently ranked 211 out of about 343, increasing from a rank of 219 with the fiscal year 2023 balances.

The graph below shows the historical average fund balance percentage for all school districts in the state, compared to Brainerd Public Schools' percentage, leading up to fiscal year 2024, which is the most recent data compiled by MDE.

	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24

Funding

State basic general education aid serves as the school district's primary funding source and this is based upon the basic funding formula. For 2025-26 an increase of 2.74 percent in the basic aid funding formula per student, along with a projected decrease of 126 students was factored into the formula.

Within the omnibus education bill passed during the 2023 legislative session, the general education funding formula was authorized to increase by an inflationary factor or 2.74 percent to an amount of $7,481 in 2025-26, up from $7,281 in 2024-25.

The components of state basic general education aid equal the total funding for each category, multiplied by the school district's number of students as measured by "pupil units", as described in the enrollment section.

In addition to general foundational formula aid, approximately 74 percent of Minnesota school districts have additional voter approved operating funding as part of local property tax levies.

These local levies provide additional revenues supported by increased real estate taxes for home and commercial property owners in the school district.

Legislation brought significant changes to local property tax revenue authority for school districts. State law was enacted allowing local school boards the authority to levy up to $724 per pupil for additional funding for general operating. This provided approximately $1.8 million in additional funding beginning with the fiscal year 2016 budget.

Sources of the school district's funding can be divided into three main categories: local, state and federal.

- Local funds are primarily comprised of funding received from the local property tax levy and any fees that are generated by the school district.
- State funding is the largest source and includes aid received from the state's general budget.
- Federal funds primarily consist of Adult Basic Education, Indian Elementary and Secondary, Carl Perkins, Minnesota Department of Education grants, School Nutrition, Special Education and Title funds.

Enrollment

Because nearly all of a school district's revenue is based on the number of students it serves, accurately projecting student population is critical in developing an accurate budget for the upcoming year. Brainerd Public Schools uses an enrollment projection model that takes into account the following historical data and assumptions to project the school district's future enrollment trends:

- 4 year low of county birth rates that later enter kindergarten
- 2 year average of cohort survival rates between grades

The enrollment model uses the average from the most recent two years to calculate the percentage of students lost or gained, as there is transition between grades to project future transition losses or gains in each grade. From there, the senior class is removed each year, producing the overall enrollment projections.

Projection Based on 2 Year Average

Year	EC	PKG	HCP-K	REG-K	1	2	3	4	5	EC to Gr 5	6	7	8	Gr 6-8	9	10	11	12	Gr 9-12	Total
2020-21	119	16	100	287	426	407	450	446	458	2,709	477	487	486	1,450	537	499	485	488	2,009	6,168
2021-22	122	19	130	315	389	414	416	442	432	2,677	464	482	480	1,425	488	523	478	509	1,999	6,102

2024-25	86	76	0	332	386	417	457	402	394	2,551	401	426	420	1,247	494	491	496	473	1,954	5,751
2025-26	87	77	0	343	342	381	421	461	401	2,513	389	404	423	1,216	445	487	483	486	1,900	5,630
2026-27	85	76	0	331	348	338	385	425	441	2,429	379	392	401	1,173	448	438	479	473	1,838	5,440
2027-28	85	75	0	329	341	344	342	388	406	2,310	435	383	389	1,207	425	441	432	469	1,767	5,283
2028-29	84	75	0	327	339	337	347	344	371	2,224	400	439	380	1,219	412	419	434	423	1,688	5,131

The school district has budgeted annual average daily membership (ADM) for preschool through grade 12 enrollment to be 5,630 for the 2025-26 budget year, a decrease of approximately 121 students from the current forecast of 5,751 at the end of the 2024-25 school year.

The school district's ADM enrollment for state aid payment factors the ADM of 5,630 by the weighting for each grade-level category to determine the pupil unit count. This pupil unit count is then multiplied by the general education aid formula amount to determine the total amount of state aid.

The table below illustrates the student weightings showing the change between 2024-25 and 2025-26 in terms of student enrollments in ADM converted to pupil units using the different weighting categories:

Student Weighting Structure for 2024-25			
	ADM	Weighting	Pupil Units
Early Childhood (EC)	86.0	1.00	86.0
Voluntary Prekindergarten (VPK)	76.0	1.00	76.0
Kindergarten (KG) - Grade 6	2,789.0	1.00	2,789.0
Grade 7 - Grade 12	2,800.0	1.20	3,360.0
Total	**5,751.0**		**6,311.0**

Student Weighting Structure for 2025-26			
	ADM	Weighting	Pupil Units
Early Childhood (EC)	87.0	1.00	87.0
Voluntary Prekindergarten (VPK)	77.0	1.00	77.0
Kindergarten (KG) - Grade 6	2,738.0	1.00	2,738.0
Grade 7 - Grade 12	2,728.0	1.20	3,273.6
Total	**5,630.0**		**6,175.6**

Factored into the estimated increase in general aid revenue, this decrease in enrollment (127 average daily membership or 135 pupil units) will have a negative impact on the school district's revenue.

Capital Funding and Expenditures

From two different sources – operating capital and long-term facilities maintenance revenue. While these revenues and expenditures are contained within the restricted account area of the General Fund budget, it is important to highlight this financial area of the school district. The capital budget includes things such as maintaining facilities, furniture, fixtures and equipment and technology needs. The tables below show a summary of the school district's capital budget for 2024-25 and 2025-26.

	Revised Budget 2024-25	Preliminary Budget 2025-26
Beginning Balances:		
Operating Capital	$2,170,714	$1,915,319
Long-Term Facilities Maintenance (LTFM)	$1,929,474	$959,518
TOTAL BEGINNING BALANCES	**$4,100,188**	**$2,874,837**
Revenues:		
Operating Capital	$1,389,994	$1,373,778
LTFM	$972,313	$4,583,244
TOTAL REVENUES	**$2,362,307**	**$5,957,022**
Expenditures:		
Operating Capital Building and Grounds Assessments/Taxes	$10,900	$10,900
Operating Capital Building and Grounds Equipment/Vehicles	$180,000	$243,000
Operating Capital Building and Grounds Projects	$50,000	$0
Operating Capital Health Service Products	$10,000	$10,000
Operating Capital Music	$30,000	$20,000
Operating Capital Gichi-ziibi Equipment	$36,000	$0
Operating Capital Gichi-ziibi Staff	$67,022	$67,180
Operating Capital Technology Copiers and Printers	$163,259	$166,438
Operating Capital Technology Device Lease (Staff/Students)	$317,208	$303,725
Operating Capital Technology Licenses/Devices	$291,000	$395,000
Operating Capital Technology Staff	$0	$480,756
Operating Capital Textbooks/Software	$400,000	$358,768
Operating Capital Transportation Vehicles	$90,000	$0
LTFM Projects, Services and Supplies	$1,564,450	$4,231,199
LTFM Staff	$377,819	$384,170
TOTAL EXPENDITURES	**$3,587,658**	**$6,671,136**
EXCESS(DEFICIT)	**($1,225,351)**	**($714,114)**
Ending Balances:		
Operating Capital	$1,915,319	$1,233,330
LTFM	$959,518	$927,393
TOTAL ENDING BALANCES	**$2,874,837**	**$2,160,723**

Post-Employment Benefits

Post-employment benefits refers to employer-paid benefits for retirees with the except of pensions. For Brainerd Public Schools and other districts across the state, these benefits primarily include retirement health care benefits that exist in current labor agreements.

Minnesota State Statute 471.61, Subdivision 2b. states, "A unit of local government must allow a former employee and the employee's dependents to continue to participate indefinitely in the employer-sponsored hospital, medical, and dental insurance group that the employee participated in immediately before retirement." This means the school district is mandated or obligated to provide employees with indefinite access to its health benefits plan after retiring.

Although these benefits have been a part of government finances for many years, beginning in fiscal year-end 2009, school districts were required to compute the sum of the current and future cost of providing these post-employment benefits and report this total as a liability on the financial statements.

Other government entities already had existing levy authority to cover a portion of the cost associated with the post-employment benefits from local taxes. Up until 2009, school districts had been forced to cover the entire post-employment costs on the pay-as-you-go method from the General Fund. In 2008, the Minnesota Legislature enacted a law (Minnesota Statutes, Section 475.52, Subdivision 6.) closing this inequity gap between other municipal government units and school districts. This law allowed school districts to compute the post-employment benefit liability and have the ability to issue bonds for the liability, with the bond proceeds structured to pay the ongoing cost of the post-employment benefits. At this time, a separate fiduciary fund (Fund 45) was established to account for this outside of the General Fund financial operations of the school district.

In June 2009, the school board approved the issuance of bonds to fund the current accrued liability and the bond proceeds were placed into a trust account. This trust account acts as a saving account in which the interest earnings and principal can only be distributed back to Brainerd Public Schools over time to pay for the post-employment benefit costs, which have normally been funded from the general education operating funds.

Because of Brainerd Public Schools' size, an actuarial report must be completed every two years to assess any increases or decreases in its total liability. This report analyzes the employee and retiree bases and the school district's benefit structure to calculate the total current and future cost of funding the post-employment benefit commitments.

This report speaks of two types of costs: direct and implicit subsidies. The implicit subsidy is the indirect cost the school district incurs for having retirees within the insurance pool. The direct subsidy is the amount the school district currently pays in contributions toward retiree health insurance premiums according to the current provision in the employee labor agreements. These paid benefits have been historically bargained with its various employment groups.

In best addressing this issue, the school district developed a comprehensive three-step strategy, which involved:

1. Identifying the liability and obligation
2. Funding the current liability and obligation
3. Collectively reforming the structure of benefits with employees

In rounds of labor negotiations, the retirement health insurance benefits were eliminated for new employees hired after 2009. From this point forward, the school district is tasked with managing the funds within the trust account to pay for the obligation of these retirement health care benefits for those employees that remain eligible for them.

The original intent of developing this funding structure by issuing the bonds and creating the trust as a long-term funding mechanism is to ensure payment of the direct benefits over the remaining duration of the benefit obligation sunset period, so that it permanently eliminates this expenditure burden on the school district's General Fund. Thus, the overall objective in the management of this retirement benefit fund is reviewing and best forecasting returns and growth of the trust account funds at a rate and total amount sufficient to pay the current and projected remaining benefits.

The liability and obligation are defined, calculated, and illustrated in two different ways.

1. The liability amount includes information about the school district's current remaining eligible staff and calculates the value of those benefits the employees have already earned or accrued during the time worked for the school district thus far.

2. The net present value amount uses a number of assumptions to forecast the total future cost of paying the benefits for the closed group over the expected remaining duration of the benefit payout and present value calculates this total future amount back to an amount in today's dollars.

The net present value amount for the current actuarial study reports the amount of funds needed in the trust account today to pay out the projected future benefits given the following assumptions:

- Rate of return on the trust funds
- Expected increases in medical premium cost
- Expected retirement age
- Average duration the retirement benefits are paid to the remaining eligible employees

This total estimated future amount is then calculated in today's dollars. The net present value amount tells how much the school district should have in the trust account today if the school district expects to earn on these funds over time to pay for the future benefits given the assumptions used about future medical costs and how the school district's employees are going to retire and draw the benefit.

If the school district had a structure in which it was going to simply pay out to the remaining eligible employee only what was accrued thus far in the years of service, the actuarial liability amount would be most relevant as this would reflect what the school district would presently pay employees to "buy out" of what was presently earned or accrued; however, the current payout strategy and structure includes a sunset payout of the originally structured benefits over time, which means the net present value calculation is the better measurement of the funding status given this benefit payout strategy and structure.

Since the change in the reporting requirement, the school district has completed nine full actuarial reports. The first report in 2008 includes no sunset or elimination of benefits. The report completed in 2010 captures the sunset elimination reform that was completed during collective bargaining of the 2009-11 labor agreements. The most recent report completed in July 2024 was the first report where the trust was underfunding, meaning there are more liabilities than funds in the trust. The next report will be completed using information as of July 2026.

The Post-Employment Benefit Trust Fund began its first use in fiscal year 2012 to pay all of the direct payments and $375,000 of the implicit rate subsidy in fiscal year 2016 and 2017. Fiscal year 2018 was the first year the distribution equaled both the direct and implicit amounts. The school district's budget for 2025 and 2026 includes a distribution equal to both the direct and implicit amounts.

The trust account has grown since inception, while at the same time the accrued liability and present value of benefit payments has decreased with the level or remaining recipients decreasing, subsequently closing the gap between the current trust balance and the net present value amount of payment of these benefits.
